

MAZDA MOTOR EUROPE – PRESS RELEASE

MAZDA PRESENTS WORLD PREMIERE OF TWO VISION MODELS AT JAPAN MOBILITY SHOW

- Mazda Vision X-Coupe embodies further evolution of Kodo design language and "Mazda Mobile Carbon Capture" technology.
- Mazda Vision X-Compact proposes human sensory digital model and empathetic AI.
- All-new Mazda CX-5 is on public display for the first time.

Hiroshima / Leverkusen, 29 October 2025. During the press conference at the Japan Mobility Show 2025¹ today, Mazda Motor Corporation (Mazda) unveiled two vision models, the Mazda Vision X-Coupe and the Mazda Vision X-Compact ('X' pronounced as 'cross'), both embodying the Company's theme for this year's exhibition: "The Joy of Driving Fuels a Sustainable Tomorrow" for 2035.

The **Mazda Vision X-Coupe** is a sports coupe that embodies the further evolution of 'Kodo-Soul of Motion' design language. It is powered by a plug-in hybrid system integrating a two-rotor rotary turbo engine with a motor and battery. With an output of 510 PS, the vehicle offers a driving range of 160 km in motor-only mode and up to 800 km when operating in combination with the engine. Furthermore, by combining carbon-neutral fuel derived from microalgae with Mazda's proprietary CO₂ capture technology, "Mazda Mobile Carbon Capture," the vehicle contributes to reducing atmospheric CO₂ the more it is driven.

Mazda Vision X-Coupe

The **Mazda Vision X-Compact** is a model designed to deepen the bond between people and cars through the fusion of a human sensory digital model and empathetic AI. Acting like a close companion, it is capable of engaging in natural conversation and suggesting destinations, helping expand the driver's world. This represents Mazda's vision for the future of smart mobility, where vehicles and people form an emotional connection, much like a heartfelt relationship.

Mazda Vision X-Compact

Furthermore, the **All-new Mazda CX-5** (European specification)², is on display to the general public for the first time ever. Featuring a spacious interior, refined KODO design, and enhanced *Jinba Ittai* (oneness between driver and car) driving dynamics, this model represents the evolution of a best-selling vehicle that has sold over 4.5 million units³ across more than 100 countries and regions. This latest model is designed with Mazda E/E Architecture+, the new electrical and electronic architecture offering an evolved driving experience.

Masahiro Moro, Representative Director, President and CEO of Mazda, stated: "The phrase, 'The joy of driving fuels a sustainable tomorrow,' expresses not only Mazda's fundamental spirit, but also the core of its future challenges. Under the shared global mission of achieving carbon neutrality, Mazda believes that the joy of driving can be a force for positive change for society and the planet. We remain committed to fulfilling the desire of those who love cars and wish to continue driving as long as possible."

Mazda will continue to evolve the 'Joy of Driving' based on the value of 'Radically Human,' and will aim to deliver the 'Joy of Living' by creating exciting mobility experiences in our customers' daily lives.
